Vision

We envision a world in which all Indigenous people are healthy in mind, body, and spirit; the spread of HIV, STIs, and viral hepatitis is prevented; every person knows their status and lives free from stigma and discrimination; and every person has access to high quality, holistic care that reflects Indigenous values, promoting relationships with each other, the land and all beings.

Core Values

The Strategy centers core values that partners perceived to be common across many Indigenous communities, including...

Strategy Components
