COORDINATION

TA AND CAPACITY
BUILDING

- In February 2020, HRSA HAB appropriated \$70 million to Ryan White HIV/AIDS Program (RWHAP) recipients to link people with HIV to critical care and treatment services and provide workforce training and technical assistance.
 - Ryan White HIV/AIDS Program Parts A and B
 - Technical Assistance Provider
 - Systems Coordination Provider
 - AIDS Education and Training Center (AETC) Program for workforce capacity development
- Implementing evidence-informed practices focused on those not yet diagnosed, those diagnosed but not in HIV care, and those who are in HIV care but not yet virally suppressed.
- In March 2021, HRSA HAB was appropriated \$105 million for FY 2021 RWHAP Ending the HIV Epidemic recipients.

Clients Receiving RWHAP and Ending the HIV Epidemic Initiative Services, and ART Prescription, March–August 2020

RWHAP EHE-funded providers submitted data to the EHE Triannual Module for the first reporting period [March through August 2020]. These data^a represent clients that received services, of whom **nearly 6,300 were new to RWHAP** and an additional **3,600 were re-engaged^b in RWHAP services**.

^a Unpublished data, HIV/AIDS Bureau, March through August 2020. Clients may have received multiple services and appear in each category of services received.

^b Estimated based on reported numbers of total clients served, new clients, and existing clients.

RWHAP EHE Recipient Accomplishments & Activities

March – October 2020

Activities implemented by EHE recipients

% of RWHAP EHE Recipients (n=47)

How are EHE activities different from traditional RWHAP-supported activities?

New technologies

New service delivery models & programs

Develop infrastructure

PrEP Implementation in Health Centers

Progress report data* from the **health centers** that received **\$54 million** in FY 2020 Primary Care HIV Prevention (PCHP) funds showed that within 8 months of award:

- **93%** had **hired** new staff (389 FTEs);
- Over **573,000** patients were **tested** for HIV;
- **2,260** patients were **newly diagnosed** with HIV and received follow-up within 30 days; and
- **Nearly 50,000** patients were prescribed **PrEP**.

Additionally, between 2014-2019, health centers increased the number of PrEP providers and patients at a higher rate than other care delivery settings in the EHE priority counties.**

*Internal data, Bureau of Primary Health Care, March-November 2020

** Unpublished, preliminary analyses conducted by CDC and HRSA

FY 2020 New and Ongoing Initiatives to Support EHE

- **Expanding Interventions**

- Improving Care and Treatment Coordination: Focusing on Black Women with HIV
- Building Capacity to Implement Rapid Antiretroviral (ART) Initiation for Improved Care Engagement
- Ryan White HIV/AIDS Program Best Practice Compilation

- **Developing Capacity**

- Enhancing Engagement of People with HIV through Organizational Capacity Development and Leadership Training
- Reducing Stigma at Systems, Organizational, and Individual Client Levels in the Ryan White HIV/AIDS Program

- **Increasing Data Utilization**

- Ryan White HIV/AIDS Program Data Dashboard

Community Engagement Framework

HRSA's EHE Community Engagement in FY 2021

- **HRSA will host virtual EHE listening sessions by region in FY 2021**
 - Sessions will engage state and local health departments, community health centers, community organizations serving people with HIV, primary care offices, AIDS Education and Training Centers, and people with lived experience
- **HRSA HAB is developing needed tools and providing leadership training to people with HIV**
 - Efforts support ways for people from the community to provide services within their community to engage people into care and treatment
- **HRSA HAB is supporting organizations to hire people with HIV**
- **HRSA HAB is continuing to support community engagement efforts of our national partners and CHAC workgroup**

Viral Suppression among RWHAP Clients, by State, 2010 and 2019— United States and 2 Territories^a

IN 2010
69.5%
VIRALLY SUPPRESSED

Viral Suppression (%)

- 52.9-66.8
- 66.9-72.8
- 72.9-79.9
- 80.0-86.9
- 87.0-89.3
- 89.4-92.3
- 92.4-96.6

IN 2019
88.1%
VIRALLY SUPPRESSED

Viral Suppression among Key Populations Served by the Ryan White HIV/AIDS Program, 2010 and 2019—United States and 3 Territories^a

Hispanics/Latinos can be of any race.
 Viral suppression: ≥ 1 OAHS visit during the calendar year and ≥ 1 viral load reported, with the last viral load result < 200 copies/mL.
 Includes data from 50 States, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands.

Viral Suppression among Black/African American Women Served by the Ryan White HIV/AIDS Program, 2019—United States and 3 Territories^a

N represents the total number of clients in the specific population.

Includes females aged 13 years and older.

Viral suppression: ≥1 OAH visit during the calendar year and ≥1 viral load reported, with the last viral load result <200 copies/mL.

^a Guam, Puerto Rico, and the U.S. Virgin Islands.

Mitigating HIV Disparities: The end+disparities ECHO Quality Collaborative

- Quality collaborative utilizing Institute of Healthcare Improvement and Project ECHO methodologies
- Focus on youth, MSM of color, transgender people, Black/African American women
- Reached 130,000 RWHAP clients, reducing number of people NOT virally suppressed by 25%
